iTalk200 4G NFC

Global PTT service via 4G network
Cost-effective professional trunked features
Easy-to-deploy & Easy-to-expand network
Large coverage & less limit in capacity with professional appearance

Features:

- **Global PTT Service:**
  Users can use PTT service globally via public operator's existing mature 4G network.
- **4G / GSM (GPRS) / WIFI Transmission:**
  It provides flexible ways of using PTT service under various radio environments, if WiFi is on, WiFi will be the first choice for transmission; if WiFi is off, then 4G comes first.
- **NFC (optional) / Bluetooth:**
  NFC and Bluetooth function modules bring more possibilities for extended use, like guard patrol options.
- **GPS**
- **Remote Programming over the Air via Public Radio Network Enables Lower Customer Maintenance Cost:**
  Users can modify the setting for the two-way radio through web-based management platform or App in smart phone, then the modified parameters will be sent to radio via 4G network automatically
- **Remain User Operation Habits of Critical Communication:**
  With supporting basic functions of professional two-way radio, like voice services (all call / group call / private call alert call etc); Text message; Tone alert (incoming call / outgoing call / text message / talk permit / low battery / emergency panic) etc.
- **Advanced Signalling Service**
- **Kill / stun / revive, to enable flexible management**
- **iTALKPTT software-Includes monitoring / recording and a unique guard patrolling system**
- **IP54 Protection Design (Splash Proof)**

iTalk300 4G NFC

The Kirisun iTalk300NFC PTT / PoC Handheld Two-Way Radio is designed to meet the demands of modern communication needs, this cutting-edge radio brings together the power of push-to-talk and the convenience of cellular/WIFI networks, featuring dual sim-card slots, ensuring seamless and efficient communication across various industries and applications.

Key Features:

1. Global PTT Connectivity: With global push-to-talk functionality, the Kirisun iTalk300 enables instant communication with your team members no matter where they are. Whether it's across town or across borders, stay connected at the push of a button.

2. Advanced Signaling: Take control of your communication with advanced signaling options like kill, stun, and revive. These features provide enhanced security and privacy, ensuring that your conversations remain confidential and secure.

3. GPS Positioning: Never lose track of your team's location. The built-in GPS feature allows you to monitor the real-time positions of your team members, improving coordination and safety.

4. NFC for RFID Tag Scanning: The inclusion of NFC technology enables convenient RFID tag scanning. This feature proves invaluable in scenarios where asset tracking or identification is crucial, making the radio a versatile tool for a range of industries.

5. Voice and Tone Services: Communicate in multiple ways. The Kirisun iTalk300NFC

iTalk 840 4G GATEWAY GSM/DMR – Mobile

iTALK840 Gateway series supports voice interconnection between DMR/Analogue and PTT radios. It can be widely used in different zones, formats and frequency bands.

Features:

- **Interconnection Between Private Network and Public Network:**
  iTALK840-GW gateway supports voice interconnection between DMR and PTT Radio.
- **Multiple Network Access:**
  2G / 3G / 4G / Wi-Fi network ensures wide coverage and stable connectivity.
- **Multiple Private Communications Formats:**
  iTALK840-GW gateway supports voice interconnection between analog and DMR Tier II.
- **Interconnection Between VHF and UHF:**
  iTALK840-GW gateway supports voice interconnection between different frequencies in VHF(136-174MHz) and UHF(400-470MHz).
- **High Transmitting Power:**
  10 Watt power ratings allows wider coverage.

iTalk BC9 - Body Camara

Body camera with integrated PoC, video dispatch and command and intelligent AI applications.

- On-site Real-time Video & Audio Streaming

- Dual Rotatable Camera

- Push-to-Talk Over Cellular

- NFC / Bluetooth
  NFC and Bluetooth function modules bring more possibilities for extended use, like guard patrol and Time & attendance options.

- Visualized Dispatching
  With 4G, it can provide a real-time monitor and control the on-site terminals.

- Video Application
  It supports multichannel video pulling, silent monitoring, video conference, and live streaming.

- GPS Positioning
  The map viewing, and GPS positioning in real-time enhance the work efficiency.

- Multiple Audio Calls
  With the dispatcher, BC9 supports group call, full-duplex call, conference call, broadcast call, dynamic group assignment, priority call, forced disconnect, override and other functions.

- Emergency Alarm
  The one-button design enables all the on-site information including real-time audio and video, location, terminal ID to be uploaded to the control center automatically.

- System Architecture
  Could or exclusive server supports redundancy backup, data encryption, storage expansion and role-based control and user authorization for security.

iTalk 9000 iAccess – Access Control

The iTALKPTT 9000 Barcode Scanning Terminal is a high quality hand-held data collection device. Ideal for Estate Management-Offices-Complexes, combined with the iAccess app, this is your complete Visitor Management solution!

Features:

- High speed 4-core Android 8.1 System
- 4.5 Inch HD screen
- Access Control
- PTT
- Vehicle/ID/Drivers License scanning
- Photos
- Panic Button
- 4G
- WiFi
- Bluetooth
- 2D Scanning
- NFC
- Camera
- GPS

We Thank you for the opportunity and your interest in our products. We look forward to being of any further advice. Your requests for a detailed quotation can be sent to us or you can contact us directly.

Also please feel free to enquire about our new Products and Service ranges.

Kopaneng supply all Security, Safety and Risk Products/Solutions.

Pleas note: All prices are subjected to approval and stock availability. Prices and Services can change without any notice.

We look forward to to hear from you soon.
